

## Espresso Coffee Machine De-Tannin Powder

DESCRIPTION	PRODUCT NO: PN902
<p>Halo Coffee Machine Cleaning Powder has been formulated to act quickly to remove tannin stains and oil deposit residues which result from coffee &amp; tea brewing. The non-clogging formula works when in contact with very hot water in the machine cleaning cycle. Halo produces active oxygen when dissolved in very hot (typically 85oC+) water. Active oxygen lifts stains to clean surfaces and is biodegradable. Halo also contains an anti-redispersion agent to help prevent dirt and debris re-settling back onto surfaces.</p>	<div data-bbox="1114 427 1294 602" data-label="Image"> </div> <p data-bbox="1129 622 1283 685">PACK SIZES: PN902</p> <p data-bbox="1015 692 1398 723">Unit: 500g   Packed 12 per case</p> <div data-bbox="1158 745 1273 1077" data-label="Image"> </div>
FEATURES & BENEFITS	<h3>PRODUCT INFORMATION</h3>
<ul style="list-style-type: none"> <li>Improves machine performance because it removes tannin and oil deposits which can cause bitter tasting drinks</li> <li>Quick dissolving (almost instant) and fast acting which helps reduce operator cleaning time</li> <li>Contains detergency to prevent dirt and debris reforming on surfaces</li> <li>Taint free and safe in contact</li> <li>Designed to perform as well as industry leading brands</li> </ul>	<p><b>Appearance:</b> White Powder  <b>Odour:</b> Minimal  <b>Solubility:</b> Completely miscible  <b>pH:</b> 11.4 (10g/100ml)  <b>Contains:</b> Sodium Carbonate, Sodium percarbonate, Sodium metasilicate</p> <p><b>Place of Manufacture:</b> UK  <b>Export tariff:</b> 3808 9420  <b>UN Number:</b> UN1759  <b>Class:</b> 8  <b>Packing Group:</b> II</p> <p data-bbox="1031 1666 1398 1697">Scan QR code to order now:</p> <div data-bbox="1114 1711 1331 1928" data-label="Image"> </div>
DIRECTIONS	
<ul style="list-style-type: none"> <li>For tea &amp; coffee machines, add 20g (4 heaped teaspoons) to the blanking plate or brewing chamber in hot water cycle mode (up to 98°C) for 10 minutes or machine cycle time, then rinse.</li> <li>For beverage or vending machines, place approx. 5-10g powder (1-2 heaped teaspoons) into empty brewer or chamber and fill with very hot water (not boiling) and leave 1-2 minutes or run hot water vend, then rinse.</li> <li>For soaking etc. 10g per 100ml (100g/litre) very hot water (not boiling) &amp; soak for 1-2 minutes or wipe, then rinse.</li> <li>For de-tannin pipes, plug pipe end, mix solution as above and leave for 2 minutes repeating action until clear then rinse.</li> <li>For laundry items, cloths etc., mix 50g per 1 litre hot water and use as a pre-wash soak for max 5 minutes. Check fabric for suitability.</li> </ul>	

Always read the label & product information before use.
